Ring measurement worksheet

Print at 100% / Actual size. Turn off Fit to page. Verify the 50 mm line below with a real ruler. If it is not exactly 50 mm, do not use this printout to measure.

This line must measure exactly 50 mm.

Option A - a ring that fits. Use a ring worn on the intended finger and hand. Measure straight across its centre, inside edge to inside edge, excluding the metal. Record the inside diameter in millimetres; repeat the reading.

Option B - paper around your finger. Cut out the strip below. Wrap it flat around the base of the intended finger, snugly without squeezing. Mark where its starting edge overlaps. Flatten it and read the length from the starting edge to your mark. This is circumference, not diameter. Check that the loop passes over your knuckle.

Cut along the dotted outline.

Start at the left edge (0 mm). This strip is 100 mm long.

Measure with hands at a normal temperature, and repeat at another time of day. Keep both readings if they differ. If you are unsure, your knuckle is much wider than the base, or this is a gift, choose the help option instead of guessing a size.

Write a separate entry for each ring

Order / ring colour / size number (if chosen):

Hand and finger (for your own reference):

Method (diameter / circumference / known size + system):

First reading (mm):

Second reading (mm):

Save your answers: visit secondly.com/pages/size, sign in with the email used at checkout, and open your order. Find "Ring size", choose a "Size number" for each ring and select "Save my size". Check for "Saved to order" after submitting.

Your size is saved with your order. You can return to update it before shipping. See page 2 for our size chart. Need help? hello@secondly.com

secondly

Secondly size chart

Match your measurement to a size number below. These numbers apply to our chart and may differ from the size you wear in other rings. Choose a separate size for each ring in your order.

Size number	Inside diameter	Circumference
8	18.1 mm	56.8 mm
9	18.9 mm	59.3 mm
10	19.8 mm	62.2 mm
11	20.6 mm	64.7 mm
12	21.5 mm	67.9 mm

How to use the chart: measure inside edge to inside edge across a ring that fits, or measure around your finger with the paper strip on page 1. Keep your actual readings even after choosing a size number. If your readings do not match a size, use the help option instead of guessing.

Between sizes or outside this range? Open "Other sizing options or help" on your order. You can send your measurements, enter a usual jewellery size and sizing system, or choose "I need help / this is a gift".

Save for each ring: visit secondly.com/pages/size and sign in with your checkout email. Open your order, find "Ring size", choose each "Size number" and select "Save my size". Your saved answers are available on your order page.
